- Challenge #6: **DigitalBalance@home:** Helen-Sarah Klaas, Angelika Lange, Stiftung Kindergesundheit

Challenge #6

Challenge

“DigitalBalance @home”

Healthcare Innovation Program

SoSe 2026

A joint initiative by

Who we are

Names:

- Helen-Sarah Klaas
- Angelika Lange

Roles:

- Head of Digital Programmes
- Head of Innovation Hub Child and Adolescent Health

Our Chair:

- Prof. Dr. Berthold Koletzko, Head of the Department of Metabolic Disorders and Nutritional Medicine, Dr. von Hauner Children's Hospital Munich
- Dr. Katharina Bühren, Medical Director of kbo-Heckscher Clinic for Child and Adolescent Psychiatry

This is Our Challenge For You

Problem Title:

DigitalBalance @home - Digital resilience starts with parents

Importance of the Challenge:

Digital media is shaping family life – constantly and often unconsciously

Reduced emotional presence

weaker parent-child connection

mental health risks

➤ Digital resilience doesn't start with children. **It starts with parents.**

This is the Potential Outcome

Potential Outcome(s):

An **easily accessible, impactful solution** that empowers parents to

reflect media habits

build healthier behaviours

strengthen mental well-being

become positive role models

 > Digital / combination of app-based and offline experiences. GOAL: **real behavioural change**
How can a digital solution solve a digital problem - without creating new dependencies?

Benefits of the Potential Outcome:

- Stronger mental health in families
- Better parent-child connection
- mindful, self-determined media use across generations

shaping **healthier family dynamics** in a digital world

What is Available / Can be Used to Work on The Challenge:

Freedom to explore digital and hybrid solutions / real-world relevance, impact driven perspective

These are The Needed Skills

Skills Needed to Work on The Challenge:

- UX & user-centered thinking / Basic prototyping
- Understanding of lasting behavioural change & motivation
- Interest in mental health, family dynamics and children's health
- Creative problem-solving across digital and real-world contexts
- Marketing & go-to-market thinking

Future Prospects:

- Real-world implementation potential in collaboration with a non-profit organization
- Opportunity to shape how families live with technology in the future
- Contribution to a very important societal questions:

How do we stay mentally healthy in a digital world?
